

# Assignment 04

## 1D Arrays (Handwritten in A4 pages):

1. Write a program to search for an element from an array input from the user.
2. **Inserting** an element into a position of an array. The element and the insertion point are inputs from the user.
3. Inserting a number into the proper position of an array which is sorted in ascending/descending order.
4. **Delete** an element from an array. Take the element as input.
5. Write a program to find out the **maximum, minimum, median** and **mode** of an array of numbers.
6. Write a program to delete **duplicate** elements from an array.
7. Write a program to reverse an array.
8. Write a program to **merge** two arrays removing the duplicate elements.
9. Write a program to **merge** two sorted arrays.
10. Take **n** numbers as input (you can use array) from the user. Find out their **GCD** (Greatest Common Divisor) and **LCM** (Least Common Multiple).
